

EXCEL CHATGPT FUNCTION

A simple way to use CHATGPT to create responses from inputs in excel

1

Setup your OpenAI account

Go to the OpenAI web site and click Sign Up, and create an API key, save this as you will need it later

<https://openai.com/api/>

2

Setup Excel Components

Open Excel and enter developer console (ALT+F11), click on Tools References and select "Microsoft Scripting Runtime" and press ok.

3

Open the Kontain ChatGPT Macro Enabled Workbook

Download the workbook from our website in the resources area, open it in excel. Open Developer console (ALT+F11) and set the auth parameter with your OpenAI key.

<https://kontainit.co.uk/resources/>

4

Use the GPT function

Simply type =gpt() and pass in the cell that you want to search GPT with. This can be used in a table as a formula across a range of cells.
